

Campus Notification / Evacuation

Security and Communication

Communication and Emergency Systems for Campuses

The communication platform to support safety in everyday campus life

The need for security communication is on the rise, especially on campuses. Having options ready to protect teachers and students in case of an attack is often considered a basic requirement at campuses. Besides personal safety, this includes the protection of property during lessons. Campuses must be safe – in case of violence or even inclement weather.

Duress Communications – In event that someone feels threatened or is being attacked:

- Highly Visible Emergency Call Points all over campus
- Instantaneous Call Connect
- Strobe/Locator Lamp at all Emergency Call Points
- Graphic and Text Call Location Information at Central Security
- Clear Voice communication between the Emergency Call Point and Central Security
- Ability to call up a nearby camera
- Audio Monitoring – Place emergency call by screaming

Campus Wide Emergency Notification – During times of terrorist Threat, Shootings, Extreme Weather or other Natural Disaster:

- Notification of a Problem – Fast, reliable communications from anywhere on campus to Central Security
- Instant Audio Announcements to the entire campus or to portions of the campus

Commend – Security for Campuses

In a time when Campus Security is increasingly challenging, it is more important than ever to utilize available state-of-the-art tools to help protect campus employees, students, guests and residents.

Threats come in a variety of forms including: ➤ **Sexual Assault** ➤ **Shootings** ➤ **Terrorist Threat** ➤ **Extreme Weather** ➤ **Robbery**

Commend emergency communication and notification systems connect internal security staff with the scene of event and ensure the protection of people, buildings and property.

Elevator Communication

Crystal clear voice transmission for elevators and machine rooms.

Dormitories

Stations for campus-wide announcements and emergency call purposes.

Laboratories and workshops

Detergent-resistant Intercom stations enable reliable campus-internal communication for chemistry and physics labs.

Telephone interface

External help is always available at the push of a button, whether at the main point of request, classrooms or gyms, via ISDN or VoIP (Voice over IP) connections.

Stanchions

Stanchions provide information and allow for making emergency calls in case of accidents.

Mass Notification

Reach anyone, anytime – increasing your effectiveness for emergency notifications.

Security Office

Allows for handling calls, making targeted announcements to specific classrooms or the entire campus, automated playback of pre-recorded warning messages, options for connecting to rescue services' communication networks.

ComWIN Graphic Visualization program allows the Security Guard to see, at a glance, the exact location of a caller and the appropriate camera image is displayed.

Video-supported door communication

Secure controlled building access after lessons start, supported by switchable video streams that can be forwarded to smartphones.

Parking Entrances & Ticket Machines

Intercom stations at barriers for access control and at ticket machines in cases of questions or errors.

A variety of different Call Point designs guarantees a perfect security solution.

Commend Intercom for Campuses

The communication platform to support safety in everyday campus life

Security staff is constantly available via Intercom

Benefits for the Security Personnel:

- Rapid response to emergency situations (emergency calls or system alarms)
- Automated contacts triggered by sound and movement sensors
- Video confirmation via Intercom/camera interface
- Simple, ergonomic user interface for all communications, control and monitoring functions
- Support provided by predefined plans on a simple Graphic User Interface
- Flexible and efficient use of valuable security personnel due to simple call handling and call forwarding options

Overview of Technical Advantages

- Instant Communication (100 milliseconds call connect time) from remote Emergency Call Points to Central Security
- Emergency Call Activation by Scream or Gun Shot
- Wide variety of Tamper and Weather Resistant Security Call Point Substations
- Highly visible Security Stanchions and Security Wall Housings, complete with emergency strobe / locator lamp
- Commend Master Stations include large Graphic Displays i.e. to show exact location of a caller)

- Commend's ComWIN Graphic Visualization program allows the Security Guard to see, at a glance, the exact location of a caller, the appropriate video image and to read detailed information of the Call Point location and to dispatch personnel and/or make announcements
- ComWIN Webclient transforms any computer or smart device in your network into an Intercom visualization

Emergency Call Stations ensure safety on widespread campus areas

Benefits to people throughout campus

- Highly visible personal contact at doors, barriers and emergency Call Points
- Immediate response to emergency calls and inquiries
- Clarity and speed in providing assistance
- Confidence boosted by direct voice contact with Security Personnel
- Easy contact with Security Personnel ensures acceptance and continued use of the system

- The Commend system allows Security Personnel to make instant voice emergency announcements to individual Emergency Call Points, Groups of Emergency Call Points or to Thousands of Emergency Call Points and to PA Systems simultaneously, allowing an entire campus or facility to be evacuated in minutes, not hours
- Installation Options – Commend Security Intercom Stations can be installed on twisted pair wire, fibre optics, IP or a combination of all 3
- System Supervision – The Commend Campus Emergency Communications / Notification System is fully supervised (Intercom speaker, microphone, station electronics, installation cable, network and central electronics are constantly being checked)
- Alternate Routing – Network connections are continuously checked and in event of network failure, calls can be rerouted, ensuring that emergency calls always go through

A strong worldwide network.

Commend is represented the world over by local Commend partners, ensuring enhanced security and communication with tailored Intercom solutions.
